3. Customer-specific solutions

emtrion develops and produces customer-specific hardware and software

Outsourcing – fully or partly

Benefits for the customer:

- proven design
- short time-to-market – the customer develops on a standard emtrion board
- boards are optimised for cost and functions
- development outsourcing
- life cycle management outsourcing
- hardware and software support by emtrion

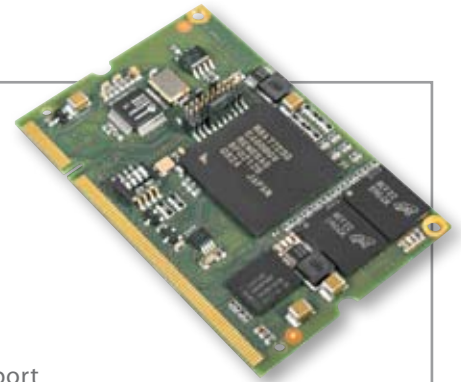

4. Reference boards

The customer uses emtrion source code and schematics, either fully or partly (only BASE board), for customer-specific hardware and software

Benefits for the customer:

- proven design
- short time-to-market – the customer develops on a standard emtrion board
- boards are optimised for cost and functions
- utilisation of the own production and development capacities
- own expertise is expanded and retained
- emtrion is available as a partner for hardware and software support
- source code/circuit diagrams/buy out/licensing possible – costs according to project

5. Development of applications and drivers

Customer needing special drivers or software modifications (among others start screen, splash screen), emtrion develops customer-specific software.

Benefits for the customer:

- short time-to-market – the customer concentrates on his core competence
- development outsourcing
- life cycle management outsourcing
- software support by emtrion
